AdisInsight: Trials (formerly Adis Clinical Trials Insight) is a leading source of in-depth and up-to-date clinical trial data, with coverage of both international and observational trials. Quickly identify the key clinical trials being performed to advance drugs in commercial development through international regulatory pathways.

Profiles include:

- Phase of trial and current status
- Trial purpose, focus and design
- Primary and other endpoints
- Diseases and subjects treated
- Inclusion and exclusion criteria
- Trial identifiers
- Organizations involved
- Initiation, completion and end dates
- Interventions
- Study center and investigator details
- Trial history
- Outcomes and results
- Related authors

Highly structured evaluations of key papers from international biomedical journals and conferences cover clinical data and trials in the following areas:

- Affective Disorders
- Alzheimer’s, Cognition Disorders
- Antibacterials
- Antithrombotics
- Antivirals
- Anxiety Disorders
- Arrhythmias
- Cancer Chemotherapy
- Cardiovascular Disorders
- Congenital Disorders
- Connective Tissue Disorders
- Diabetes
- Digestive System Disorders
- Ear, Nose and Throat Disorders
- Endocrine Disorders
- Epilepsy and Seizure Disorders
- Eye Disorders
- Genitourinary Disorders
- Haematological Disorders
- Heart Failure
- Hyperlipidaemia
- Hypertension
- Immunological Disorders
- Inflammation
- Irritable Bowel Syndrome
- Ischaemic Heart Disease
- Liver Disorders
- Men's Health
- Metabolic Disorders
- Mouth Disorders
- Musculoskeletal Disorders
- Mycoses
- Nausea & Migraine
- Neurological Disorders
- Nutritional Disorders
- Obesity
- Obstructive Airways Disease
- Pain Control
- Parasitic Infections
- Parkinson's Disease
- Peptic Ulcer Disease
- Psychotic Disorders
- Respiratory Tract Disorders
- Rheumatic Disease
- Skin Disorders
- Thrombosis and Embolism
- Transplant Rejection
- Vaccines
- Vascular Disorders
- Viral Infections
- Women’s Health

A Phase 2b Randomized, Double-Blind, Placebo-controlled Study to Evaluate the Safety and Efficacy of MEDI8897, a Monoclonal Antibody With an Extended Half-life Against Respiratory Syncytial Virus, in Healthy Preterm Infants

AdisInsight: Trials  (Sep 1, 2016).

☐ Full Text  Translate

Study Design:
double-blind, multicentre, parallel, prospective, randomised

Study Endpoints:

Incidence of hospitalization due to RT-PCR confirmed RSV
safety issue: No
description: The incidence of RSV hospitalization 150 days post dose will be summarized by treatment group.
time frame: 150 days post dose

Safety and tolerability as assessed by the occurrence of all treatment emergent adverse events (TEAEs) and treatment emergent serious adverse events (TESAE)
safety issue: Yes
description: Safety of MEDI8897 will primarily be assessed and measured by the occurrence of all treatment-emergent AEs and SAEs.
Other safety assessments will include the occurrence of AESIs and NOCDs.
time frame: 360 days post dose

Single-dose serum concentrations of MEDI8897
safety issue: No
description: MEDI8897 serum concentration data will be tabulated by treatment group along with descriptive statistics. Terminal-phase half-life (t1/2) will be estimated using non-compartmental analysis, if data permit.
time frame: 360 days post dose

Incidence of anti-drug antibody (ADA) to MEDI8897 in serum
safety issue: No
description: The incidence of ADA to MEDI8897 will be assessed and summarized by number and percentage of subjects that are ADA positive by treatment group.
time frame: 360 days post dose

Incidence of medically attended LRTI due to RT-PCR confirmed RSV
safety issue: No
description: The incidence of RSV LRTI (inpatient and outpatient) 150 days post dose will be based on RSV test results (performed centrally via RT-PCR) and objective clinical LRTI criteria and will be summarized by treatment group.
time frame: 150 days post dose
Study Details:
Status: initiated
Planned Start: September 2016
Planned Finish: April 2018
Design: double-blind, multicentre, parallel, prospective, randomised
Phase: II
Endpoints:
- Incidence of hospitalization due to RT-PCR confirmed RSV
  safety issue: No
description: The incidence of RSV hospitalization 150 days post dose will be summarized by treatment group.
time frame: 150 days post dose
- Safety and tolerability as assessed by the occurrence of all treatment emergent adverse events (TEAEs) and treatment emergent serious adverse events (TESAE)
safety issue: Yes
description: Safety of MEDI88987 will primarily be assessed and measured by the occurrence of all treatment-emergent AEs and SAEs.
Other safety assessments will include the occurrence of AESIs and NOCDs.
time frame: 360 days post dose
- Single-dose serum concentrations of MEDI8897
  safety issue: No
description: MEDI8897 serum concentration data will be tabulated by treatment group along with descriptive statistics. Terminal-phase half-life (t1/2) will be estimated using non-compartmental analysis, if data permit.
time frame: 360 days post dose
- Incidence of anti-drug antibody (ADA) to MEDI8897 in serum
  safety issue: No
description: The incidence of ADA to MEDI8897 will be assessed and summarized by number and percentage of subjects that are ADA positive by treatment group.
time frame: 360 days post dose,
- Incidence of medically attended LRTI due to RT-PCR confirmed RSV
  safety issue: No
description: The incidence of RSV LRTI (inpatient and outpatient) 150 days post dose will be based on RSV test results (performed centrally via RT-PCR) and objective clinical LRTI criteria and will be summarized by treatment group.
time frame: 150 days post dose
Study Center: MedImmune LLC
Companies: MedImmune

Subject Details:
Planned No: 1500
Location: Argentina, Australia, Belgium, Brazil, Bulgaria, Canada, Chile, Czech Republic, Finland, France, Germany, Hungary, Italy, Multinational, New Zealand, Poland, Russia, South Africa, Spain, Sweden, United Kingdom, USA
Disease: Respiratory-syncytial-virus-infections
Patient Inclusion: Key 1. Healthy infants born between 29 weeks 0 days and 34 weeks 6 days GA 2. Infants who are entering their first full RSV season at the time of screening Key
Patient Exclusion: 1. Meets AAP or other local criteria to receive commercial palivizumab 2. Any fever (≥ 100.4°F [≥ 38.0°C], regardless of route) or lower respiratory illness within 7 days prior to randomization 3. Acute illness (defined as the presence of moderate or severe signs and symptoms) at the time of randomization 4. Active RSV infection (a child with signs/symptoms of respiratory infection must have negative RSV testing) or known prior history of RSV infection 5. Receipt of palivizumab or other RSV monoclonal antibody or any RSV vaccine, including maternal RSV vaccination
Planned Patient Number: 1500
Patient Age Keywords: infant, neonate

</table>

Search Tools

Field codes are used to search document fields, as shown in the sample document. Field codes may be used in searches entered on the Basic Search, Advanced Search, and Command Line search pages. Limit options, Look up lists, and “Narrow results by” filters tools are available for searching. Some data can be searched using more than one tool.

Limit Options

Limit options are quick and easy ways of searching certain common concepts. Short lists of choices are available for:

**Document type and Language**

**Date limiters** are available in which you can select single dates or ranges for date of publication and updated.

Look up Lists

You can browse the contents of certain fields by using Look Up lists. These are particularly useful to validate spellings or the presence of specific data. Terms found in the course of browsing may be selected and automatically added to the Advanced Search form. Look Up lists are available in the fields drop-down and in the search options for:

**Subject, Substance, and Author**
and in the fields drop-down only for:

**Publication title**

**“Narrow Results By” Filters**

When results of a search are presented, the results display is accompanied by a list of “Narrow results by” options shown on the right-hand panel. Click on any of these options and you will see a ranked list showing the most frequently occurring terms in your results. Click on the term to apply it to (“narrow”) your search results. Narrow results by filters in Adis Clinical Trials include:

- **Subject, Substance, Author, Publication title, Document type, Publication date**

**Look up Citation**

If you need to trace a particular bibliographic reference, use the Look Up Citation feature. Find a link to this toward the top left of the Advanced Search page, or in the drop list under Advanced on any search form; click this and you will go to a page where you can enter any known details of the citation, including: Document title, Author, Publication title, ISSN, ISBN, Volume, Issue, Page, Publication date, DOI.

**Document Formats**

Pre-defined document formats are available for viewing and download. Search results can be downloaded with the Download all results, Email, Print and Export/Save options, and when creating an alert. To design your own download format, choose the “Custom” format option and check the fields to be displayed.
