

THE LANCET® TITLES

Description

This database covers all the titles produced by the publishers of one of the world's leading medical journals, *The Lancet*®. Lancet Titles include: *The Lancet*, *The Lancet Oncology*, *The Lancet Infectious Diseases*, and *The Lancet Neurology*.

The Lancet Titles database contains full-text articles from the weekly general medical journal, *The Lancet*. The Lancet's goal is to advance or illuminate medical science and practice. Coverage extends to all aspects of human health.

Known for its independent, authoritative voice in global medicine, its publishing history includes reports on numerous medical breakthroughs in the last 200 years, including shell shock therapy, penicillin, and birth defects to more recent medical advancements such as the description of a new variant of Creutzfeldt-Jakob disease and the identification of corona virus as a possible cause of SARS. The Lancet was the first journal to carry a reference to the Ebola virus, and arguably the first to publish a letter from Alexander Fleming.

Before publication, papers undergo rigorous peer review and when appropriate, examination by a statistician. Approximately 40% of contributions come from Europe, 40% from the U.S., and 20% from the rest of the world. In addition to articles and short reports, *The Lancet* also carries news items and a substantial letters section, thus promoting lively debate of medical issues. Information regarding the Cited Publications are included in documents when available.

Published since 1823, *The Lancet* continues to provide physicians, researchers and journalists with an informative, critical and insightful view of medicine today.

The database contains the full text of all articles published in *The Lancet* since 1992, *The Lancet Neurology* since 2002, *The Lancet Infectious Diseases* since 2001 and *The Lancet Oncology* since 2000.

An embargo is present so articles appear online two months after their appearance in the hard copy. The articles' tables, illustrations, photographs and other graphical material may be viewed by following links in each record to ProQuest's collection of "text plus graphics" and full page images.

Subject Coverage

The Lancet is a multi-specialty and cross-disciplinary file that covers issues relevant to both industrialized and non-industrialized countries.

- Anti-infective therapy
- Bacterial infections
- Breast cancer
- Cerebrovascular disease
- Dementia/Alzheimer's disease
- Endocrine system cancer
- Epidemiology, cancer prevention and cancer control
- Epilepsy and seizures
- Gastrointestinal cancer
- Gastrointestinal infections
- Genetics
- Genitourinary cancer
- Gynecological cancer
- Hematological cancer
- Head and neck cancer
- Headache and migraine
- Health-care systems
- HIV/AIDS
- Imaging
- Malaria
- Motor neuron disease/amyotrophic lateral sclerosis
- Movement disorders
- Multiple sclerosis
- Neurological infections
- Neurological tumors
- Neuromuscular disorders
- Neuro-oncology
- Pediatric infections
- Pediatric neurology
- Pediatric oncology
- Parasitic and fungal infections
- Peripheral nerve disorders
- Respiratory tract infections
- Sarcoma
- Sexually transmitted infections
- Skin cancer
- Sleep disorders
- Supportive care
- Thoracic oncology
- Trauma
- Tropical/travel medicine
- Tuberculosis and mycobacterial infections
- Urinary tract infections
- Viral infections

Date Coverage

The Lancet: from 1992
 The Lancet Infectious Diseases: from 2001
 The Lancet Neurology: from 2002
 The Lancet Oncology: from 2000

Update Frequency

Weekly

Geographic Coverage

International

SAMPLE DOCUMENT

The screenshot shows a ProQuest database interface. At the top left is the ProQuest logo. To its right is the text 'Lancet Titles' in a large, bold, orange font. Below this are links for 'Basic Search', 'Advanced' (with a dropdown arrow), 'Command Line', and 'Pricing' (with a price tag icon). Below the search links is a navigation bar with 'Full text' in orange, a '< Back to results' link, and a '> Previo' link. Below the navigation bar is a light blue bar with 'Add to selected items' (with a checkbox icon), 'Save to My Research' (with a folder icon), 'Email' (with an envelope icon), and 'Print' (with a printer icon). The main content area displays the title 'Epilepsy surgery in children and adults' in bold. Below the title is the author information: 'Ryvlin, Philippe; Cross, J Helen; Rheims, Sylvain. **The Lancet Neurology** 13.11 (Nov 2014): 1114-26.' followed by a 'Pricing' icon. Below the author information is a 'Show duplicate items from other databases' link. To the right of this link is a 'Highlighting: Off | Single | Multi' dropdown menu. Below the title and author information is a section for 'Abstract (summary)' with a 'Translate' link. The abstract text reads: 'Epilepsy surgery is the most effective way to control seizures in patients with drug-resistant focal epilepsy, often leading to improvements in cognition, behaviour, and quality of life. Risks of serious adverse events and deterioration of clinical status can be minimised in carefully selected patients. Accordingly, guidelines recommend earlier and more systematic assessment of patients' eligibility for surgery than is seen at present. The effectiveness of surgical treatment depends on epilepsy type, underlying pathology, and accurate localisation of the epileptogenic brain region by various clinical, neuroimaging, and neurophysiological investigations. Substantial progress has been made in the methods of presurgical assessment, particularly in patients with normal features on MRI, but evidence is scarce for the indication and effect of most presurgical investigations, with no biomarker precisely delineating the epileptogenic zone. A priority for the development of epilepsy surgery is the generation of high-level evidence to promote the harmonisation and dissemination of best practices.' Below the abstract is a section for 'Full Text' with a 'Translate' link. The full text begins with 'Introduction' and reads: 'Epilepsy surgery is now accepted for the management of drug-resistant focal epilepsy. Seizure freedom is achieved in a variable proportion of patients according to epilepsy type, underlying pathology, duration of follow-up, and series reported. In specific situations in which a surgical cure is not possible, palliative epilepsy surgery might be offered with the main aim of minimising the frequency and severity of seizures. Cognition, behaviour, and quality of life can improve substantially after epilepsy surgery, particularly in children. The risks of serious adverse events and deterioration of clinical status should not be neglected, but can be minimised in carefully selected patients in whom surgical treatment offers a favourable risk-benefit balance. Epilepsy surgery has consistently proved to be a cost-effective strategy in both adults and children. 1-3' followed by '(...)'.

Document feature	DF	df(maps) df(table)	
Document text	TX	tx("drug-resistant focal seizures")	Use adjacency and/or Boolean operators to narrow search results.
Document title	TI	ti("epilepsy surgery in children and adults")	Use adjacency and/or Boolean operators to narrow search results.
Document type	DTYPE	dtype(article) dtype(commentary)	

¹ A Lookup/Browse feature is available for this field in the Advanced Search dropdown or in Browse Fields.

First available	FAV	fav(2014-10-21)	Indicates the first time a document was loaded in Lancet Titles. It will not change however many times the record is subsequently reloaded, as long as the accession number does not change.
From database ²	FDB	ti(operational research) AND fdb(socialscisearch) ti(operational research) AND fdb(1008294)	Useful in multi-file searches to isolate records from a single database. FDB cannot be searched on its own; specify at least one search term then AND it with FDB.
Issue	ISS	iss(11)	Also searchable via the Look Up Citation tool.
Journal name	JN	jn("The Lancet") jn("The Lancet Neurology")	Use PUB for all Publication titles. Look Up list available for Publication Title (PUB).
Language	LA	la(english)	All documents are in English.
Location ¹	LOC	loc(london)	Use the browse feature to find locations.
MeSH ¹	MESH	mesh(thrombosis)	Use the Look Up feature to find correct MeSH terms.
Named person ¹	PER	per(atwood, margaret) per(koop*)	
Pagination	PG	pg(1114-26)	The start page is searchable on the Look Up Citation page.
Publication date	PD	pd(201411) pd(2010-2011) pd(>20140331)	Also searchable via the Look Up Citation tool.
Publication title ¹	PUB	pub("The Lancet") pub("The Lancet Neurology")	Also searchable with JN.
Publication year	YR	yr(2014) yr(2012-2014)	Also searchable using PY. Date range searching is supported.
References			See Cited references.
Subject ¹	SU	su(stents) su("drug resistance")	Use MeSH to find MeSH terms. Other subject terms are found in the SU field.
Tag	TAG	tag(abuse)	User-applied keywords that display just below the record. See the HELP for Tags for a complete explanation for Tags.
Title (Document)	TI	See Document Title	Use adjacency and/or Boolean operators to narrow search results.
Updates	UD	ud(2014-12-06)	The date(s) the document was loaded as a result of an update provided by the supplier.
Volume	VO	vo(13)	Also searchable via the Look Up Citation tool.

SEARCH TOOLS

Field codes are used to search document fields, as shown in the sample document. Field codes may be used in searches entered on the **Basic Search**, **Advanced Search**, and **Command Line** search pages. **Limit options**, **Look up lists**, and **"Narrow results by" filters** tools are available for searching. Some data can be searched using more than one tool.

LIMIT OPTIONS

Limit options are a quick and easy way of searching certain common concepts. Check boxes are available for:

Full text, Peer reviewed, Humans, Animals, Females, Males

Short lists of choices are available for:

Age group, Document type

² Click the "Field codes" hyperlink at the top right of the Advanced Search page. Click "Search syntax and field codes", then click on "FDB command" to get a list of database names and codes that can be searched with FDB.

Date limiters are available in which you can select single dates or date ranges for the date of **publication**, and **updated**.

LOOKUP LISTS

You can browse the contents of certain fields by using Look Up lists. These are particularly useful to validate spellings or the presence of specific data. Terms found in the course of browsing may be selected and automatically added to the Advanced Search form. Look Up lists are available in the fields drop-down and in the search options for:

Subject, MeSH

and in the fields drop-down only for:

Author, Publication title, Companies/organizations, Location, Person

“NARROW RESULTS BY” FILTERS

When results of a search are presented, the results display is accompanied by a list of “Narrow Results by” options shown on the right-hand panel. Click on any of these options and you will see a ranked list showing the most frequently occurring terms in your results. Click on the term to apply it to (“narrow”) your search results. Narrow Results by Filters in the Lancet include:

Full text, Peer reviewed, Scholarly journals, Publication title, Document type, MeSH, Publication date

LOOK UP CITATION

If you need to trace a particular bibliographic reference, use the Look Up Citation feature. Find a link to this towards the top left-hand corner of the Advanced Search page; click this and you will go to a form where you can enter any known details of the citation, including: Document title, Author, Publication title, ISSN, ISBN, Volume, Issue, Page, Publication date, DOI.

DOCUMENT FORMATS

You can **view** search results online in Brief View, Detailed View, KWIC, or Preview formats.³

View ⁴	Description	Online	Export/Download
Brief view result listing	Title and Publication date	✓	
Detailed view result listing	Same as Brief view plus a 3-line KWIC window	✓	
KWIC (Keyword in context)	Detailed view plus all occurrences of your search terms, highlighted within the fields where the terms occur	✓	✓
Preview	Title, Author, Publication title, Volume, Issue, Pagination, Publication date, Abstract, Subject	✓	

³ To view a more complete record, click on one of the pre-defined formats listed beneath the title in your Results list, e.g., Brief Citation, Citation/Abstract, Full Text, etc.

⁴ The data contained in each view may vary by database and by the type of account you have, e.g., subscriber or transactional.

To **save** records, click the checkbox next to the records then click “Export/Save.” Under “Output To” choose one of the output options, e.g., Data Star Tagged, EndNote, HTML, etc. The output option you choose will determine the formats available under “Content”.⁵

Document format	Description	Online	Export/Download
Brief citation	Bibliographic record minus Abstract, Indexing and References	✓	✓
Citation	Bibliographic record plus Indexing.	✓	✓
Citation/Abstract	Complete bibliographic record	✓	✓
Full text	The complete record with full text	✓ ⁶	✓
Full text + graphics	Complete record with full text plus graphics	✓	✓
Full text PDF	PDF version of the original article	✓	
Custom	To design your own download format, choose the “Custom” format option in the Export/Save menu, and check the fields to be downloaded.		✓ ⁷

To **download** all search results in a set use “Download All Results” and follow the same steps as for Export/Save. The search results list is included in every download and export option along with the records you choose to save.

Terms & Conditions

In addition to the [Dialog Standard Terms & Conditions](#), the following provider terms and conditions also apply.

The Lancet(c) is a registered trademark of Elsevier Properties, S.A., used under license. Database copyrighted by Elsevier Limited.

Contact: **ProQuest Dialog Global Customer Support**

Email: Customer@dialog.com

Within North America **1 800 334 2564**

Outside North America **00 800 33 34 2564**

⁵ For example, if you choose to output in XML, you can only get the most complete record available. Text Only, PDF, RTF, and HTML output options allow the most format choices.

⁶ Full text is not available for export/download where only A&I (abstract & indexing) data is available.

⁷ Custom export/download format is available in the following mediums only: HTML, PDF, RefWorks, RTF, Text only.

If you choose records in a mix of formats you will only have certain formats to choose from when you download or export results. If you want the full text of a record, view the record using the Full Text option then save it.
