

Abstracts

Northern Light provides deep and timely coverage of life sciences research presented at conferences. The database contains references to all data made available by the conference sponsor and can predate by many months – even years – the information that gets published in scholarly journals: Northern Light makes the data available for searching within three weeks of being posted on the conference sponsors' sites.

Records can be searched by disease, treatments, drugs, clinical trial phases, medical devices, and therapies. Sponsoring organizations from all fields of biomedicine, clinical medicine, life sciences, nursing, and pharmacology from around the world are included in the database.

Since more than fifty percent of trials reported at conferences never reach full publication, Northern Light Life Sciences Conference Abstracts - representing 'grey literature' - is of critical importance to R&D personnel in pharmaceutical and other biomedical corporations, to academics, healthcare policy organizations, hospital laboratories, and anyone with an interest in cutting-edge life science research.

At launch, the database covers some 2.7 million conference abstracts and over 140,000 posters (containing statistical and graphical data) covering some 3,800 life sciences conferences back to 2010.

Northern Light records on Dialog contain the document title, conference title, author names, conference start date, sponsor, and indexing terms to identify the subjects and concepts covered, as well as a snippet of the abstract. The full abstract is only accessible by linking back to the conference website (link provided). This ensures that the database is 100% copyright compliant. Northern Light cannot guarantee that all websites remain available indefinitely as they are administered independently; they estimate that – on average – some 10% of sites are inactive, though fewer in the current year. Only conferences that are openly available are covered in Northern Light; any requiring membership to access the abstracts are not included.

Use Northern Light Life Sciences Conference Abstracts to:

- Validate that research is novel and while brainstorming an idea designing a study or applying for a grant
- Search for unpublished studies or data to reduce level of possible bias
- Track details on investigator sponsored trials of your company's drug at conferences
- Gather comprehensive data about the results of another pharmaceutical company's drug – or for drug discovery, to assist preclinical studies for competitive purposes

TI Apatinib Combined With Taxanes And Platinum Neoadjuvant Chemotherapy For Patients With Triple-Negative And HER2-Positive Breast Cancer: A Multicenter, Randomized, Open-Label, Phase II Trial

AU Yunjiang, Liu; Xiangmei, Zhang; Li, Wang; Miao, Cao; Shuo, Zhang; et al. **San Antonio Breast Cancer Symposium 2020** (Dec 8, 2020)

Highlighting: [Off](#) | [Single](#) | [Multi](#)

AB **Abstract (summary)** Translate [unavailable for this document]

Apatinib combined with TP neoadjuvant chemotherapy significantly increased the pCR rate in patients with locally advanced triple-negative and HER2-positive breast cancer, indicating an applicable strategy in the future.

Search Fields

Field Name	Field Code	Example	Description and Notes
Abstract	AB	ab(neoadjuvant n/3 chemotherapy) ab("her2-positive breast cancer")	Use proximity and/or Boolean operators to narrow or broaden your search and double quotes to search for a precise phrase.
Abstract present	ABANY	apatinib and abany(yes)	Add AND ABANY(YES) to a query to limit retrieval to records with abstracts.
Accession number	AN	an(PE20201229010003510)	A unique document identification number assigned by the information provider.
All fields + text	--	apatinib and "pcr rate"	Searches all fields. Use proximity and/or Boolean operators to narrow or broaden your search and double quotes to search for a precise phrase.
Author ¹	AU	au("yunjiang liu")	
Author First Name	AUFN	aufn(liu)	
Author Last Name	AULN	aurn(yunjiang)	
Author affiliation	AF	af(hebei medical university)	Displays in the Author field
Conference information	CF	cf("san antonio" and breast cancer)	CF includes all conference information except the start date and can be used instead of the more specific fields CCNT, CG, CS, CFTI.

Conference country	CCNT	ccnt(us)	The conference country field has been available in Northern Light documents since September 2020. Use CF to search countries before that date
Conference location	CG	cg(san antonio) cg(virtual)	The conference location field has been available in Northern Light documents since September 2020. Use CF to search regions before that date. Some conferences are virtual and in this case the word 'virtual' appears in this field
Conference sponsor	CS	cs(aacr)	
Conference start date	CDT, ESDT	cdt(20201208) esdt(20201208)	Only a specific date can be searched – in the format YYYYMMDD. See Publication date for other search options.
Conference title	CFTI	cfti("breast cancer symposium" and 2020)	The conference title is duplicated in the Publication title field
Document title	-	-	See <i>Title</i> .
Document type	DTYPE	dtype("conference abstract")	Northern Light records are one of two Document types: Conference Abstract or Conference Poster.
First available	FAV	fav(20201231) fav(>20180119)	The date the document was loaded on Dialog for the first time. It will not change if the record is subsequently reloaded as long as the accession number remains the same. FAV supports range searching.
From database ²	FDB	ti("monoclonal antibodies") AND fdb(northern light) ti("monoclonal antibodies") AND fdb(1009284)	Used in multi-file searches to isolate records from a single file. FDB cannot be searched on its own; specify at least one search term then AND it with FDB.
Language	LA	la(english)	LA searches for language of original publication; all abstracts are in English.
Language of abstract	SL	sl(english)	All abstracts are in English.
Publication date	PD	pd("dec 8 2020") pd(20201208) pd(>20200930)	In this database, publication date refers to the start date of the conference. PD supports range searching.
Publication title	PUB	pub("breast cancer symposium" and 2020)	The conference title is duplicated here. Northern Light records are not sourced from published material but from conference sponsors' websites.

Publication year	PY, YR	yr(2020) yr(2019-2021)	Displayed as part of Publication date. YR supports range searching.
Publication type	PSTYPE	pstype("conference papers & proceedings")	The same for all records.
Subject ¹	SU	su("neoadjuvant therapy") su(hypertension)	The <i>Subject</i> field contains different indexing types: Cell, Cell receptor, Clinical trial, Diagnostic/therapeutic, Disease, Gene, Human anatomy, Mechanism of action, Medical device, and Therapeutic area. Not every record will have each type of subject indexing.
Substance	SUBST	subst("tyrosine")	The <i>Substance</i> field contains different indexing types: Drug, Generic drug, Enzyme, and Protein. Not every record will have each type of substance indexing.
Title	TI	ti(apatinib and trial)	The <i>Title</i> of the abstract or poster.
Updates	UD	ud(20201231) ud(>20201231)	The date(s) the record was loaded as a result of an update provided by the supplier. UD supports range searching.
URL		- not searchable -	The URL is a hyperlink that opens the abstract in a new tab on Northern Light's own servers. Sometimes additional information, or a link to the original published abstract/poster will be available.

1. A Lookup/Browse feature is available for this field in the Advanced Search dropdown or in Browse Fields.
2. Click the "Field codes" hyperlink at the top right of the Advanced Search page. Click "Search syntax and field codes", then click on "FDB command" to get a list of database names and codes that can be searched with FDB.

Search Tools

In addition to **Search Fields**, other tools available for searching are **Limit options**, **Browse Fields**, **"Narrow results by"**, and **Filters**. Each is listed separately below. Some data can be searched using more than one tool.

Limit Options

Short lists of choices are available for:

Document type

Date limiters are available in which you can select single dates or ranges for date of **publication** and **updated**.

Browse Fields

You can browse the contents of certain fields by using Look up lists. These are particularly useful to validate spellings or the presence of specific data. Terms found in the course of browsing may be selected and automatically added to the Advanced Search form. Look up lists are available in the fields drop-down for:

Author, Subject

"Narrow Results By" Filters

When results of a search are presented, the results display is accompanied by a list of "Narrow results by" options shown on the right-hand panel. Click on any of these options and you will see a ranked list showing the most frequently occurring terms in your results. Click on the term to apply it to ("narrow") your search results. "Narrow results by" filters in Inspec include:

Author, Conference title, Document type, Language, Publication title, Subject, Substance, and Publication date

Document Formats – Subscribers
